(a)
shared phases (model)
eTraM, day
eTraM, night
DSEC
mains lighting
mean $\cos 2\pi u$
spacing τ_i of the target pixel (ms)
(b)
density
position u in the target train
day, $\bar{Z} = 1.07$
night, $\bar{Z} = 1.09$
DSEC, $\bar{Z} = 1.22$
model, shared
model, independent
random times
(c)
model, spacing spread 0.0
model, spacing spread 0.2
reading threshold
mean Rayleigh statistic $\bar{Z}$
lock width w
